4 Universidade Federal de Alagoas, Instituto de Ciências Biológicas e da Saúde, Setor de Biodiversidade e Ecologia, Museu de História Natural, Universidade Federal de Alagoas, Brasil

*Localities.*—Brazil, Alagoas State. **Municipality of Murici:** Fazenda Bananeira (9° 16' S, 35° 59' W; 550 m, Datum: SAD69). Collection data: 4 November 1994, Col.: Eliza Maria Xavier Freire & others. Deposited in the herpetological collection of the Museum of Natural History, Federal University of Alagoas (MUFAL). MUFAL 1773, adult female (SVL [snout-vent length]: 338 mm, HW [head width]: 7.9 mm, TL [tail length]: 100.1 mm, SVL/TL: 0.30). **Municipality of Maceió:** Mata do Catolé (09° 33' S, 35° 47' W; 54 m, Datum: SAD69). Collection data: 17 July 2003, Col.: Marcelo Gomes De Lima & others. MUFAL 3012, adult female (SVL: 319 mm, HW: 6.5 mm, TL: 94.3 mm, SVL/TL: 0.29). Forest of the Serra da Saudinha (09° 23' S, 35° 43' W, Datum: SAD69). Collection data: 23 November 2004, Col.: Ubiratan Gonçalves da Silva & others. MUFAL 4186, adult male (SVL: 612 mm, HW: 10.4 mm, TL: 198 mm, SVL/TL: 0.32). MUFAL 4926, adult female (SVL: 450 mm, HW: 9.0 mm, TL: 115 mm, SVL/TL: 0.26), 09 June 2005. MUFAL 8429, adult male (SVL: 549 mm, HW: 9.7 mm, TL: 166 mm, SVL/TL: 0.30), Col.: Patrícia Carla Gomes da Silva & others.

*Comments.*—The known distribution of *Siphlophis compressus* is discontinuous. The species occurs from central Bolivia to the mouth of the Amazonas River, Costa Rica, and Trinidad and Tobago. In the Brazilian Atlantic Forest, the species is known from the states of Rio de Janeiro to Sergipe (Peters & Donoso-Barros, 1970; Freitas & Silva, 2005; Pontes

*et al.*, 2008; Bolaños *et al.*, 2010; Lula-Salles *et al.*, 2010). These new records for Alagoas State are the first for this species north of the São Francisco River, and extend the known distribution of *S. compressus* 200 km north (straight line) from Sergipe State, to the forests of the Pernambuco Endemism Center.
